

Introduction

WeRateDogs is a very famous Twitter account that started on Nov 2015, this account usually shares photos of dogs along with funny comments and a rating out of ten (sometimes more) for the dog in the photo.

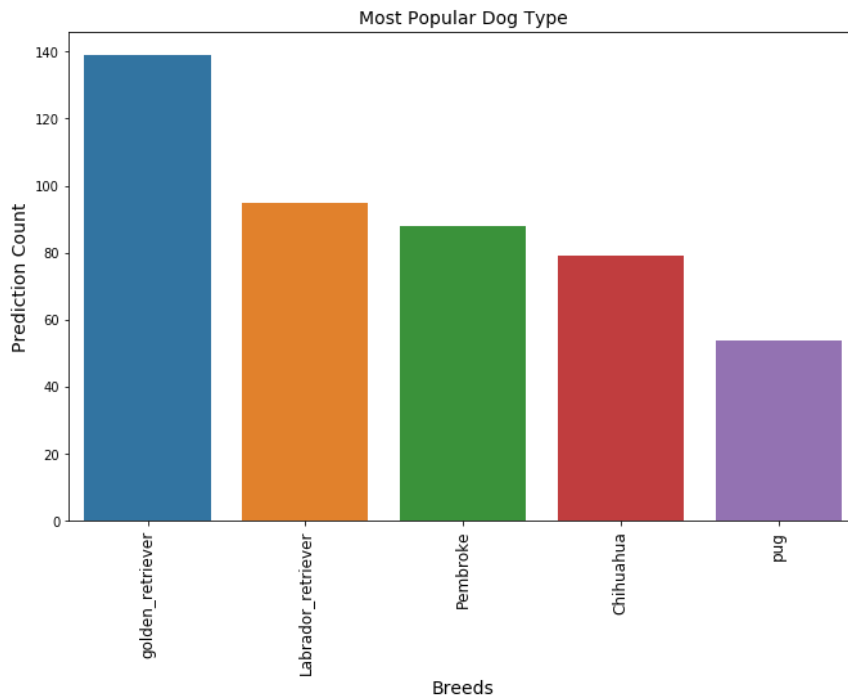

With time going on WeRateDogs became very popular and currently the account has 8.8 million followers. WeRateDogs is known as “The most famous dog rater”.

In this analysis, I will analyze WeRateDogs tweets based on three topics:

- Most Popular Dog type.
- Main source of WeRateDogs tweets.
- WeRateDogs tweets response (Retweet Vs Favorite).

During this analysis I will use 3 different visuals.

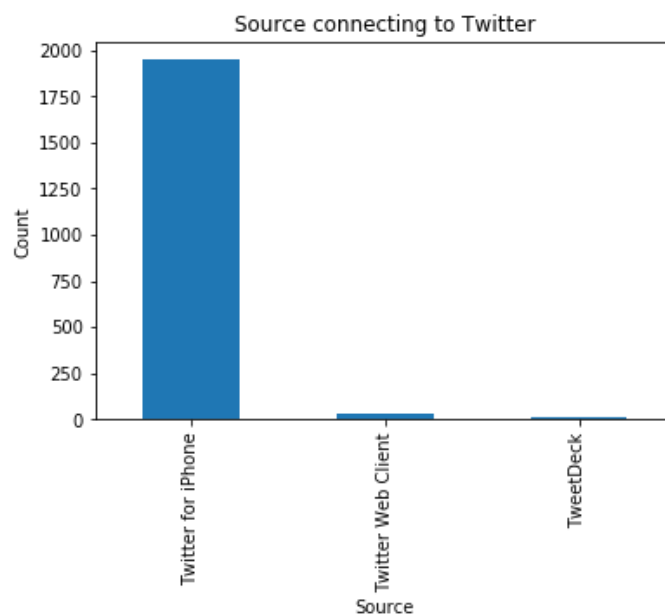

Most Popular Dog Type

By using a bar chart, we can confidently say that the most popular dog by far is Golden Retriever with near to 140 prediction count, with Labrador coming second, Pembroke third, Chihuahua fourth and Pug is on fifth place.

People seem to like Golden Retriever so much more than any other type.

What is the most used source for twitter?

By using a bar chart of source on x axis and count of tweets on the y axis we can see that the iPhone is by far the most source used for sending tweets by WeRateDogs, Twitter web client comes second and Tweet Deck last with near to zero tweets.

What is the relation between (Retweet Vs Favorite)?

From this scatter plot visual we can see that favorites and retweets increase together with similar numbers for every tweets. If the retweets increase the favorites should increase also. therefore, we can conclude that the two have a positive correlation.
